### **IT'S A FACT!**

- Skin cancer is the most common form of cancer.
- Melanoma is the most deadly form of skin cancer.
- Every hour one person dies of melanoma.
- Melanoma is the second most common cancer in people ages 15-29.
- Melanoma can affect anyone, regardless of age, sex, or race.
- Today, 1 in 50 people will develop melanoma.

## A B C's of Melanoma

### Think A-B-C-D-E

#### Remembering what to watch out for:

#### Asymmetry:

The shape of one half does not match the other.

#### Border:

The edges are often ragged, notched, blurred or irregular in outline; the pigment may spread into the surrounding skin

#### Color:

The color is uneven. Shades of black, brown and tan may be present. Areas of white, grey, red, pink or blue may also be seen.

#### Diameter:

Size changes and usually increases. Typically, melanomas are at least 6mm in diameter. (the thickness of a pencil)

#### Evolution:

Ordinary moles usually do not change over time. A mole that suddenly grows in size or rapidly becomes elevated is suspicious for melanoma.
